

AMENDMENTS TO THE SPECIFICATION:

Kindly replace the paragraph that begins at page 13, line 18 and ends at page 14, line 5 with the following amended paragraph:

As shown in Fig. 11 and 12, instrumentation 52 may be mounted on fixed battens ~~xx~~ which extend above and below the stowed truss boom 22. As shown in Fig. 12, instrumentation 52 may be located anywhere along the length of the deployed truss boom 22. Thus the present invention is an improvement over ~~the prior art, which was limited to~~ attaching systems that attached instrumentation 18 to the leading end of the truss boom 10 and stowing the instrumentation 18 exterior to the storage cannister 20, see, e.g., Fig. 1. According to another embodiment of the present invention, structural control instrumentation and optical fiber sensors may be installed integrally with the longerons 26, see Fig 12.
